Professional Summary

A software developer who has in-depth knowledge of test-driven software development. I aim at working collaboratively with teammates and clients to solve societal problems using technology and more specifically, software. In my pursuit of success, I aim to keep my belief in hard work, excellence, and integrity.

Skills and Qualifications.

- Elixir /Phoenix, Php/Laravel, Javascript, Test-driven development, CRUD / REST API, Git workflow, Agile methodologies, Html and CSS /(Zurb Foundation, Bulma and bootstrap), docker and Kubernetes, Progressive web apps.
- CI/CD with Google Cloud Services, Travis and Circle CI
- Development and testing of USSD and SMS applications
- Breaking down project milestones into user stories
- Building APIs in Elixir

Work Experience

Software developer, Podii - september 2018 - present

Duties:

- Development of websites and progressive web apps both legacy and current systems.
- Writing tests for software projects.
- Problem definition and breaking down project milestones into user stories as well as managing the user stories using Pivotal Tracker and trello.
- Leading the development of projects i.e assigning tasks to team members and ensuring that tasks are completed on time.

Open source contributor, Agile ventures charity - January 2019 - present

Duties:

- Pairing sessions to refactor existing elixir-phoenix and code
- Taking over Rails legacy applications and introducing Phoenix
- Collaborating with remote developers to build new applications for charity organizations using git, google hangouts and slack

Educational Background

Laikipia University - *2013 - 2017*

BSc Information Communication Technology
